Education

Gymnasium SUGS "Koco Racin", Sep 2014 – Jun 2018, best student in the generation of 2014 – 2018
Faculty of Electrical Engineering & Information Technologies, BSc in Electrical Engineering and Information Technologies, in Computer Technologies and Engineering, Oct 2018 –

Soft Skills

- Analysis
- Brainstorming
- Calmness
- Optimism
- Discipline
- Active listening
- Presentation skills
- Public speaking
- Googling

Professional Experience

Faculty of Electrical Engineering & Information Technologies
Internship, Oct 2020 – Nov 2020
Learned about servers, working with servers and different Operating Systems for servers(mainly CentOS), maintaining the website of the faculty, processing student data, within the Faculty Laboratory for Automatic Data Processing (FLADP)

Stopanska Banka A.D Skopje
Internship, Jun 2018 – Aug 2018
Learned to work with big data related to mortgage loans and real estate using Microsoft Excel.

Languages

Macedonian; English; Serbo-Croatian; Bulgarian; Some basic understanding of German

Programming Languages

C; Python ; Java; HTML5/ CSS3; Some experience in JS, MySQL and PHP

Programming Projects

IT Company-OOP Python Project
Typical OOP Python Project that can be used for managing an IT company. It has been made with pure Python and it has included all the basic OOP Concepts.

Sorting Algorithm Project
Project that visualizes sorting algorithms with the help of python modules like matplolib, numpy, time. It also calculates the time of sorting for every different algorithm and writes it in a .json file. The project has included 8 most popular algorithms.

Phonebook Project
Project that is a real app implemented in one company for their phonebook. It uses PHP, MySQL and jQuery (DataTables plug-in). It sorts the data, it has also implemented a search algorithm that searches through the data.

Organized events

Hour of Code, Nov 2019
An event that aims to encourage the development of the IT sector in Macedonia and to encourage young people to learn to code through workshops, quizzes, short courses and presentations of real projects.

Integral Bee, Mar 2019
An event that aims to foster the love of mathematics and the importance of mathematics for today's technological development, through a competition to quickly solve integrals.
